

Post Graduate Department of Zoology

**SCIENCE COLLEGE (AUTONOMOUS)
HINJILICUT, GANJAM, ODISHA**

M.Sc. Syllabus (2023-25)

Curriculum Overview (M.Sc.)

Distribution of Course (Semester wise)

- Semester I: Four (04) Core Courses and one Laboratory Course Work
- Semester II: Four (04) Core Courses, one Laboratory Course Work and one Value Added Course
- Semester III: One (01) Core Courses, Two (02) Electives, One (01) interdisciplinary choice elective, one (01) Laboratory Course Work and one (01) Value Added Course
- Semester IV: One (01) Core Courses, Three (03) Electives, Project, Dissertation and Viva, One (01) Add-on Added Course

Value Added Courses:

Two value added courses, (ZOOL VAC 206) and (ZOOL VAC 306), is offered by the Department respectively in the second and third semester. Value Added Course is not mandatory to qualify for any programme and shall be offered as non-credit course. Value Added Courses completed by a student shall be reflected in the mark sheet as “completed VAC” in the 2nd and 3rd semester. It is a teacher assisted learning course open to students of the department without any additional fee. However, students shall pay the prescribed examination fee and register along with other courses in that particular semester. Classes for a VAC to be reflected in the time table. The value-added courses shall be also conducted during weekends/vacation period. A student will be permitted to register only one Value Added Course in a Semester. The course can be offered only if there are at least 10 students opting for it.

Add-on Course

This course is offered in the 4th Semester by the Department of Odia. This course has been introduced with a view to familiarizing all the P.G. Students of Science College (Auto.) Hinjilicut, Ganjam with the excellent craftsmanship exemplified by the literary stalwarts including Kabi Samrat Upendra Bhanja along with the Arts, Culture and Folk Tradition of South Odisha.

Scheme of Evaluation:

1. Each theory papers having 100 Marks is divided into 20 Marks of internal evaluation and 80 Marks of final examination in each semester.
2. The question pattern is mentioned below

P.G. Sample / Model Question Paper for CBCS pattern

Symbol _____

2022

Time : 3 hours

Full Marks : 80

The figures in the right hand margin indicate marks.
Answer from both the Sections as per direction

(Paper Title)

Section-A

1.	Answer all questions from the following:	(02x10=20)
(a)	Questions covering from A.L.L. the unit	
(b)		
(c)		
(d)		
(e)		
(f)		
(g)		
(h)		
(i)		
(j)		

Section-B

Answer all questions (15x04=60)

		(Unit-I)
3.	(a)	
		OR
	(b)	Write Short Notes on: (a) (b)
		(Unit-II)
4.	(a)	
		OR
	(b)	Write Short Notes on: (a) (b)
		(Unit-III)
5.	(a)	
		OR
	(b)	Write Short Notes on: (a) (b)
		(Unit-IV)
6.	(a)	
		OR
	(b)	Write Short Notes on: (a) (b)

OR
(c) Case Study (wherever applicable)

M.Sc. Zoology General Course Framework & Structure

TOTAL			22	500
			88	2000

- Course offered for CBCT
- NC: Non Credit Value Added Courses

SEMESTER-I

Semester-One

ZOOL C 101

Biology of Non-Chordates

Credits:

Course Objectives: Objective of the paper is to provide brief idea about each taxon of the non-chordates with some important biological features.

Student Learning Outcomes: Students after completion of this course are expected to know about the non-chordate diversity, evolutionary relationship, and some basic aspects parasitism.

Unit I Lower Invertebrates Lectures:16	<ol style="list-style-type: none">1. Locomotion, and nutrition in Protozoa2. Origin of Metazoa3. Water canal system in <i>Porifera</i>4. Polymorphism in Coelenterates and affinities in <i>Ctenophora</i>
Unit II Higher Invertebrates Lectures:16	<ol style="list-style-type: none">1. Host-parasite interactions2. Coelom,metamerism and segmental organs of Annelida3. Parasitic adaptations in helminths4. Excretory structures and functions in annelids
Unit III Higher Invertebrates Lectures:16	<ol style="list-style-type: none">1. Structural organization and phylogenetic status of <i>Limulus</i>2. Parasitic castration with reference to the life cycle of <i>Sacculina</i>3. Larval forms in Crustaceans4. Structural organization and phylogenetic status of <i>Peripatus</i>
Unit IV Higher Invertebrates Lectures:16	<ol style="list-style-type: none">1. Respiration in Molluscs2. Torsion and de-torsion in Gastropoda3. Water vascular system of Echinoderms4. Larval forms in Echinodermata
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none">1. Invertebrate Zoology, R.D. Barnes2. The invertebrates, L.H. Hyman, Vol I to VI3. Invertebrate structure, Barrington, Nelson4. Invertebrate Zoology, R.L. Kotpal5. The Invertebrates: Function and Form, W. Sherman, V.G. Sherman6. A Text Book of Zoology, T.J. Parker, W.A. Haswell, Vol-I and II7. Invertebrate Zoology, Verma & Agarwal , S.CHAND Publication.

Semester-One

ZOOL C 102

Cytology and Inheritance Biology

Credits

Course Objectives: Objectives of the paper is to provide basic idea about cell biology and inheritance pattern.

Student Learning Outcomes: Students after completion of this course are expected to know different cellular organelles and their functions, cell cycle regulations, basic inheritance pattern and basic gene mapping techniques.

Unit I Cytology-I Lectures:16	<ol style="list-style-type: none">1. Structure and organization of Cell membrane2. Membrane transporter: Structure and function3. Mechanism of membrane transports4. Cell-cell interactions
Unit II Cytology-II Lectures:16	<ol style="list-style-type: none">1. Structure and function of Cytoskeleton and its role in motility2. Structure, Biogenesis and function of Lysosome and Peroxisomes3. Endoplasmic Reticulum and compartmentalization of Golgi4. Structure and function of Mitochondria and protein targeting
Unit III Cytology-III Lectures:16	<ol style="list-style-type: none">1. Nucleus and nuclear transport2. Concept and organization of Gene and Chromosome3. Cell cycle and its regulations4. Cell Division and its regulation
Unit IV Mendelism Neo- Mendelism Lectures:16	<ol style="list-style-type: none">1. Mendelian Genetics2. Neo-Mendelism, Pleiotropy, genomic imprinting, penetrance and expressivity3. Linkage and crossing over4. Extra-chromosomal Inheritance, Pedigree analysis, Complementation tests
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none">1. Molecular Cell Biology, Lodish, Berk, Kaiser, Krieger, Bretscher, Ploegh, Amon, Martin2. Molecular Biology of the Cell, Alberts <i>et al.</i>, (2008), Garland Science, New York, USA3. The Cell: A molecular approach, Geoffrey, M. Cooper, R.E. Hausman (2004) ASM Press4. Cell and Molecular biology , Gerald Karp (2015) John Wiley and sons5. Principles of Genetics, Snustad and Simmons, (4th Ed. 2005), John Wiley & Sons, USA6. Genetics, J. Russell, Benjamin-Cummings Publishing Company, California, USA

Semester-One

ZOOL C 103

Biosystematics, Conservation Biology, Evolution, and Ecology

Credits

Course Objectives: Objectives of the paper is to provide basic idea about classical and modern taxonomic approaches, Biodiversity and conservation of bio-resources, makes student aware about the evolutionary process and various components of ecosystem and their importance.

Student Learning Outcomes: Students after completion of this course are expected to get a holistic understanding of taxonomy, inculcate the value of natural environment and develop compassion toward bio-resources. Students are also expected to know the principle of evolutionary process and its application.

<p>Unit I Biosystematics Lectures:16</p>	<ol style="list-style-type: none"> 1. History of taxonomy and development of systematic, importance and application of systematic in biology, International code of zoological nomenclature (ICZN), concept of keys, type specimens 2. Morpho-taxonomy, cyto-taxonomy, molecular-taxonomy, DNA bar-coding 3. Species concept, IUCN red list of threatened species, Invasive species, Alien species, Indicator species, Keystone species, Umbrella species, Flagship species, Charismatic species 4. Modes of collection and preservation of animals, Outline classification of animals
<p>Unit II Bioconservation Lectures:16</p>	<ol style="list-style-type: none"> 1. Biodiversity (genetic diversity, species diversity, ecosystem diversity) and its use, biodiversity hotspot in India. 2. Measuring Biodiversity: alpha, beta and gamma diversity, Species Richness(S), Evenness(E), Simpson index(D), Shannon-Weiner Index (H') 3. National Act and International Act related to Biodiversity Conservation 4. In-situ conservation (Indian context) (Sanctuaries, National and Biosphere reserves) and Ex-situ conservation (Indian context) (Botanical gardens, zoos, cryopreservation, gene bank).
<p>Unit III Evolution Lectures:16</p>	<ol style="list-style-type: none"> 1. Theories of organic evolution (Lamarckism and Darwinism) and the Modern synthetic theory. 2. Phylogenetic tree, molecular phylogeny inference using DNA and protein sequences 3. Hardy-Weinberg Law 4. Isolating mechanisms, and Speciation
<p>Unit IV Ecology Lectures:16</p>	<ol style="list-style-type: none"> 1. Ecosystem structure and characteristics 2. Species Interactions 3. Population characteristics and dynamics 4. Community Ecology: Nature of communities; community structure and attributes; Ecological Succession
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none"> 1. Principle of Animal Taxonomy; G.G. Simpson. Oxford IBH Publishing Company. 2. Elements of Taxonomy. E. Mayer. 3. Theory and Practice of Animal Taxonomy. V.C. Kapoor, Oxford & IBH Publishing Co. 4. Evolution : Strickberger 5. Evolutionary analysis : Herron and freeman 6. Campbell Biology: Reece, Urry, Cain <i>et al.</i> 7. Essential of Ecology: Miller and Spoolman

Semester-One

ZOOL C 104

Biochemistry

Credits

Course Objectives: Objectives of the paper is to provide basic idea about structure, and function of bio-molecules. The papers also focus on metabolism of Bio-molecules, basic idea about enzyme, its kinetics and regulation.

Student Learning Outcomes: Students after completion of this course are expected to know different bio-molecules, their biological functions and role of enzymes in cellular metabolism

Unit I Biochemistry Lectures:16	<ol style="list-style-type: none">1. Composition, structure, types and function of carbohydrates2. Composition, structure, types and function of lipids and steroids3. Composition, structure, types and function of amino acids and proteins4. Conformation of proteins (Ramachandran plot, secondary structure)
Unit II Biochemistry Lectures:16	<ol style="list-style-type: none">1. Glycolysis and its regulation2. TCA cycle and Energetics3. Gluconeogenesis and HMP shunt4. Oxidation of Fatty acids
Unit III Molecular Metabolism Lectures:16	<ol style="list-style-type: none">1. Metabolism of amino acids2. Biosynthesis of Cholesterol3. ETC & Oxidative phosphorylation4. Urea Cycle
Unit IV Enzymology Lectures:16	<ol style="list-style-type: none">1. Enzyme structure and classification2. Principles of catalysis, enzyme kinetics, Michaelis-Menten Equation, Line-Weaver-Burke Equation3. Mechanism of enzyme action with special references to lysozyme4. Regulation of Enzyme action
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none">1. Lehinger Principles of Biochemistry, D.L. Nelson, M.M. Cox, 07th Edition2. Biochemistry, J.M. Berg, L. Stryer, J.L. Tymoczko, G.J. Gatto, 08th Edition3. Harper's Illustrated Biochemistry, V.L. Rodwell, D.A. Bender, K.M. Botham, P.J. Kennely, P.A. Weil, 31st Edition4. Principle of Biochemistry, Voet and Voet5. Biochemistry, Campbell

Semester-One

ZOOL P 105

Laboratory Course Work-I

Credits

Course Objectives: Objectives of the paper is to provide 1) hands on exposure in collection, preservation and identification of invertebrates using basic taxonomic key, 2) observation and preparation of different slides related to cell biology 3) solving different problem related to inheritance biology,4) construction of phylogenetic tree, and 5) Hand on experience on ecological adaptation and performing different biochemical experiments.

Student Learning Outcomes: Students will be able to know about collection, preservation, identification and drawing phylogenetic tree of organisms.

<p>Biology of Non-Chordate, Cellular Biology & Inheritance Biology, Biosystematics, conservation Biology, Evolution and Ecology, Biochemistry</p>	<ol style="list-style-type: none">1. Invertebrate Anatomy of preserved animals available in the market<ol style="list-style-type: none">a) Prawn (Nervous system & Statocyst)b) Cockroach (Nervous, reproductive & salivary systems)c) Squilla (Nervous system)d) Sepia (Nervous system)e) Loligo (Nervous system)f) Unio (Nervous system)2. Preparation of permanent slides (Specimen available)3. Identification with comments upon<ol style="list-style-type: none">a) Museum specimensb) Whole mount Specimensc) Permanent slides-Invertebrates4. Cytological preparations of chromosomes from onion root tip and grasshopper testes5. Demonstration of mitochondria by supravital staining in buccal epithelium6. Demonstration of Barr body in hair root and buccal epithelial cells7. Study of various animal associations8. Problem related to following aspect of genetics<ol style="list-style-type: none">a) law of independent assortmentb) Complementation testc) Sex linked inheritanced) Pedigree analysise) linkage map9. Collecting different local animals/ photographs (least concern category) and their classification using taxonomic keys10. Construction of phylogenetic tree using basic morphological features11. Construction of phylogenetic tree using 16s rRNA gene sequences retrieved from NCBI database12. Construction of phylogenetic tree using COI (Cytochrome c oxidase) gene sequences retrieved from NCBI database13. Practical related to evaluation of diversity indices: Species Richness(S), Evenness (E), Simpson index (D), Shannon-Weiner Index (H')14. Practical related to preparation of solution, buffer and measurement of pH15. Demonstration and handling of micropipette16. Biochemical (Qualitative) tests for-<ol style="list-style-type: none">a) Protein, glycogen, ascorbic acid, phosphorus, nucleic acidb) Tests for salivary amylase and invertase
---	--

SEMESTER-II

Semester-Two

ZOOL C 201

Biology of Chordates

Credits

Course Objectives: Objective of the paper is to provide brief idea about each taxon of chordates with some important biological features.

Student Learning Outcomes: Students after completion of this course are expected to know the chordate diversity and some of the important features with respect to their evolutionary relationship.

Unit I Protochordates Lectures:16	<ol style="list-style-type: none">1. Biology and evolutionary significance of Hemichordates, Cephalochordates and Urochordates2. General organization, classification and affinities of Cyclostomata3. Structural organization of Petromyzon and its comparison with Myxine4. Origin of chordates
Unit II Superclass: Pisces Lectures:16	<ol style="list-style-type: none">1. Biology and affinities of Dipnoi and Latimeria2. Swim bladder and lateral line system in fishes3. Parental care in amphibian,4. Neoteny and metamorphosis in amphibian
Unit III Class: Reptilia and Birds Lectures:16	<ol style="list-style-type: none">1. Structural organization and phylogenetic significance of Sphenodon2. Adaptive radiation in reptiles3. Origin and evolution in birds4. Flight adaptation in birds
Unit IV Class: Mammalia Lectures:16	<ol style="list-style-type: none">1. Origin of mammal2. Aquatic mammals3. Prototheria and metatheria4. Dentition in Mammals
	Recommended Textbooks and References: <ol style="list-style-type: none">1. Phylum Chordata, H. Newman2. The Life of Vertebrates, J.Z. Young3. A Text Book of Zoology, T.J. Parker and W.A. Haswell, Vol. I and II4. Vertebrate Biology, Donald Linzey5. Life of Birds, David Attenborough6. Mammals, L.P. Rema7. Vertebrate Zoology, Verma & Agarwal, S.CHAND Publication.

Semester-Two

ZOOL C 202

Molecular Biology

Credits

Course Objectives: The objectives of this paper is to provide comprehensive idea about the structure and function of nucleic acid and regulations of gene expression.

Student Learning Outcomes: Students after attending the course will understand role of bio-molecule involved in control and expression of genetic information and gene regulation at the level of transcription and translation in a better way.

Unit I Nucleic Acids Lectures:16	<ol style="list-style-type: none">1. Structure of Nucleic acids2. DNA replication3. DNA damage and repair mechanism4. Recombination: Homologous and site-specific recombination
Unit II Molecular Synthesis Lectures:16	<ol style="list-style-type: none">1. Transcription2. Post Transcriptional modifications3. Translation4. Post- translational modification
Unit III Gene Regulation Lectures:16	<ol style="list-style-type: none">1. Prokaryotic gene regulation2. Eukaryotic gene regulations3. Topoisomerase4. Viral gene regulation
Unit IV Chemical signaling Lectures:16	<ol style="list-style-type: none">1. Chemistry of hormones2. Hormones and their receptors3. General principles of cell communication, Signaling through G-protein coupled receptors,4. Second messengers signaling pathway
	Recommended Textbooks and References: <ol style="list-style-type: none">1. Molecular Cell Biology, Lodish, Berk, Kaiser, Krieger, Bretscher, Ploegh, Amon, Martin2. Cell Biology, G. Karp3. Cell and Molecular Biology, De Robertis4. Molecular Biology of the Cell, Alberts <i>et al.</i>, Garland Science, New York, USA5. Histology: A Text and Atlas, with Correlated Cell and Molecular Biology, Michael H. Ross

Semester- Two

ZOOL C 203

Physiology, Endocrinology and Histology

Credits

Course Objectives: Objectives of the paper is to provide basic idea about various physiological processes, endocrine system and basic aspect of Histology.

Student Learning Outcomes: Students after completion of this course are expected to learn basic histological features of important organ, the role of physiological processes and hormones involved in maintaining homeostasis.

Unit I Digestion, Excretion, and Circulation Lectures:16	<ol style="list-style-type: none">1. Digestive System: Secretory function of alimentary canal, Digestion, absorption2. Physiology and Biochemistry of Blood coagulation.3. Excretory System: Nephron, Mechanism of Urine formation, and Osmoregulation.4. Cardiovascular System: Double circulation, cardiac cycle
Unit II Nerve Conduction and Sense Organs, Respiration, and Thermoregulation Lectures:16	<ol style="list-style-type: none">1. Respiratory System: Mechanism of respiration and its regulation2. Nervous System: Neurons, synapse and synaptic transmission and mechanism of nerve conduction.3. Sense Organs: Vision, hearing and taste4. Types of muscle and mechanism of muscle contraction.
Unit III Endocrinology Lectures:16	<ol style="list-style-type: none">1. Structure, chemistry and function of Pituitary glands2. Structure, chemistry and function of Thyroid and para-thyroid gland3. Structure, chemistry and function of Pancreas and Adrenal gland4. Mechanism of hormone actions
Unit IV Histology Lectures:16	<ol style="list-style-type: none">1. Structure and function of epithelial tissue and connective tissue2. Cell adhesion and cell adhesion molecules3. Histological details and functions of liver4. Histological details and functions of Spleen & Kidney
	Recommended Textbooks and References: <ol style="list-style-type: none">1. Endocrinology, Hadley2. Endocrinology, Turner and Bagnora3. Comparative Vertebrate Endocrinology, P.J. Bentley4. Text Book of Comparative Endocrinology, H.A. Bern5. Animal Physiology: Adaptation and Environmental, K.S. Nelson (ed) Cambridge University Press, Cambridge, UK6. Medical physiology, Guyton and Hall7. Histology, H.R. Michael8. A Textbook of Histology, Harvey Ernest Jordan

Semester- Two

ZOOL C 204

Ethology, Applied Ecology, and Microbiology

Credits

Course Objectives: Objectives of the paper is to provide basic idea about different aspects of animal behaviour, applied ecology and microbial world.

Student Learning Outcomes: Students after completion of this course are expected to learn social organisation and their impotence in animals, pollution and its causative agents, bacterial and viral diversity, their genetics and their implication.

Unit I Ethology Lectures:16	<ol style="list-style-type: none">1. Concept of animal behavior: Innate, Acquired; Social interaction in Insects and Primates2. Altruism and Kin selection3. Neural basis of learning and memory4. Hypothalamus and regulation of animal behaviour
Unit II Applied Ecology Lectures:16	<ol style="list-style-type: none">1. Pollution and abatement of land, air and water, noise pollution2. Global warming and its consequences3. Ozone layer depletion, Acid rain-causes & consequences4. Bioremediation
Unit III Microbiology-I Lectures:16	<ol style="list-style-type: none">1. Bacteria structure and classification2. Structure and function of bacterial cell wall3. Genetic recombination in bacteria4. Antibiotics classification and mode of action
Unit IV Microbiology-II Lectures:16	<ol style="list-style-type: none">1. Viruses and their classification2. Life cycle of Bacteriophages3. Pathophysiology of CoV, and HIV4. Viruses in bioterrorism
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none">1. Ecology, E.P. Odum, R. Holt, Winston Inc., USA,2. C.S. Binoda, M.P. Nayar, River Pollution In India. APH Publ. Corpn., New Delhi.3. Campbell Biology, Reece, Urry, Cain <i>et al</i>4. Essential of Ecology, Miller, Spoolman5. Animal Behaviour, J. Alcock6. Principles of Animal Communications, J.W. Bradbury7. Semester- Two

ZOOL P 205

Laboratory Course Work-II

Credits

Course Objectives: Objectives of the paper is to provide 1) hand on exposure in collection, preservation and identification of vertebrates using basic taxonomic key, 2) observation and preparation of different slides related to histology 3) experiment related to human physiology, 4) practical related to animal behaviour, 5) performing different ecological experiments and basic microbiological experiments.

Student Learning Outcomes: On completion of this course, students are expected to learn collection, preservation, identification of vertebrates, blood physiology, histological details of important organs, experience animal behavior, physicochemical analysis of water and soil, media preparation for microbial growth and basic staining methods.

<p>Biology of Chordates, Molecular Biology, Physiology, Endocrinology and Histology, Ethology, Applied Ecology, Biogeography and Palaeontology</p>	<ol style="list-style-type: none">1. Vertebrate Anatomy of preserved animals available in Market:-<ol style="list-style-type: none">a) Scoliodon (Afferent and Efferent blood vessels, cranial nerves, internal ear, ampula ofb) Lorenzini, placoid scale)c) Cycloid and ctenoid scales of bony fishes.d) <i>Calotes</i> (Blood vascular system, and hyoid apparatus)e) Pigeon (Blood vascular system, brain, air sacs, pecten, flight and perching muscles)f) Rat (Neck nerves, brain and vascular system)2. Identification and Comments upon<ol style="list-style-type: none">a) Museum specimensb) Bonesc) Permanent histological slides3. Ecological experiments to determine-<ol style="list-style-type: none">a) Acidity, alkalinity and chlorinity of water samplesb) Dissolved oxygen content of waterc) pH of soil and water samples4. Semester-Two

ZOOL VAC 206

Bioinformatics, Biosafety and Bioethics

Credits

Course Objectives: The objectives of this course is to provide theory and practical experience to analyze different biological data using common computational tools and databases which facilitate investigation of molecular biology and evolution-related concepts in Bioinformatics. The objectives of this course are to educate students about the fundamental concepts of bioprocess technology and its related applications, thus preparing them to meet the challenges of the new and emerging areas of biotechnology industry. To become familiar with India's IPR Policy; To learn biosafety and risk assessment of products derived from biotechnology and regulation of such products.

Student Learning Outcomes: Student should be able to develop an understanding of basic theory of these computational tools; to gain working knowledge of these computational tools and methods; appreciate their relevance for investigating specific contemporary biological questions and to critically analyse and interpret results of their study. Students should be able to appreciate relevance of microorganisms from industrial context; to carry out stoichiometric calculations and specify models of their growth; to give an account of design and operations of various fermenters; to calculate yield and production rates in a biological production process, and also interpret data etc.

Unit I Bioinformatics-I Lectures:16	<ol style="list-style-type: none">1. Introduction to Bioinformatics2. DNA and protein databsae3. Searching for sequence database like FASTA and BLAST algorithm4. Sequence allignment
Unit II Bioinformatics-II Lectures:16	<ol style="list-style-type: none">1. Structural viewers of protein (PyMOL)2. Practical aspects of multiple sequence alignment (CLUSTALW/CLUSTAL X)3. Basic ideal about MEGA4. Construction of phylogenetic tree
Unit III Biosafety Lectures:16	<ol style="list-style-type: none">1. Introduction to Biological safety2. Biosafety guideline-Govt of India, Basic biosafety practices in the laboratory3. Biological hazards4. Basic idea on GMO and LMO
Unit IV Bioethics Lectures:16	<ol style="list-style-type: none">1. IPR and genetic resources2. Patent, Trade, Copyright and trade mark3. Indian patent Act, filing of patent application4. Biopiracy
An icon of an open book with two pages visible.	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none">1. Ganguli, P. SEMESTER-III

Semester- Three

ZOOL C 301

Immunology and Histochemistry

Credits

Course Objectives: Objective of the paper is to provide comprehensive idea about human immunology with special emphasis on the types of immunity and immune cells, maturation and activation of B and T-cells, antibody diversity and interaction with antigens. The paper also deals with Histochemical techniques

Student Learning Outcomes: Students after completion of this course are expected to know in details about human immune system and mechanism of immunity. The histochemical technique shall help the students in development of their research skills.

Unit I Basic Immunology Lectures:16	<ol style="list-style-type: none">1. Innate immunity2. Adaptive immunity3. Multigene organization of immunoglobulin gene4. Immunoglobulin gene rearrangement
Unit II Components of Immune System Lectures:16	<ol style="list-style-type: none">1. Antibody structure and function2. Generation of antibody diversity3. Antibody engineering4. Hypersensitivity
Unit III Histochemistry-I Lectures:16	<ol style="list-style-type: none">1. Principles and chemistry of fixation2. Metachromasia and Mordants3. Immunocytochemistry4. Quantitative histochemistry: Absorptiometry and Fluorimetry
Unit IV Histochemistry-II Lectures:16	<ol style="list-style-type: none">1. Carbohydrates by PAS method2. Protein by Mercury bromophenol blue3. Lipid by Sudan black B method4. DNA by Feulgen method and RNA by methyl green pyronin Y
	Recommended Textbooks and References: <ol style="list-style-type: none">1. Kuby Immunology, J. Punt, S. Stanford, P. Jones, J.A. Owen, 8th Edition2. Understanding Immunology, P. Wood, 02nd Edition3. Semester-Three

ZOOL E 302

Entomology

Credits

Course Objectives: To enable the students to get acquainted with origin and classification of insects. It also give insight to commercial entomology, public health entomology, house hold pest, Integrated Pest Management modules for various important crops. They will also learn about the various management strategy especially eco-friendly means of control.

Student Learning Outcomes: After the completion of the course the students will be acquainted with the different vectors, their characteristics and process of transmission and infection. The students will also learn about the management techniques of different vectors. Further, the students will also be acquainted with the different means of insect-pest management. They will also learn about the different application techniques of insecticides, and its management.

Unit I Origin and Classification of Insects Lectures:16	<ol style="list-style-type: none">1. Origin and Evolution of Insects2. Classification of insects upto order with examples.3. Growth development and metamorphosis of Insect4. Collection and preservation of insects
Unit II Economical Entomology Lectures:16	<ol style="list-style-type: none">1. Biology of honey bees and apiculture2. Lac insects and their management.3. Prospects and status of Silk producing species - their distribution and life cycle, structure of the silk gland.4. Predators, parasites and pathogens of Insects
Unit III Morphology and Bionomics of Insects Lectures:16	<ol style="list-style-type: none">1. Morphology, Bionomics and Management of important pests of Rice.2. Morphology, Bionomics and Management of pests of Mango3. Morphology, Bionomics and Management of pests of Banana4. Morphology, Bionomics and Management of household pests (Mosquitoes and Housefly)
Unit IV Social and Physiological Aspects of Insects Lectures:16	<ol style="list-style-type: none">1. Social behaviour in Insects2. Physiology and mechanism of Compound vision3. Insect Hormones with special reference to Pheromones4. Thermoregulation in Insects
	Recommended Textbooks and References: <ol style="list-style-type: none">1. The Insects: An Outline of Entomology, P.J. Gullan, P.S. Cranston2. General Text book of Entomology, O.W. Richard, R.G. Davies, Part I & II3. Insect Biology-A textbook of Entomology, H.E. Evans, Wesley Publ. Co..4. General Entomology. M.S. Mani, Oxford & IBH Publ. Co.5. Insects, M.S. Mani, National Book Trust, India6. A Textbook of Entomology, H.H. Ross, C.A. Ross, J.R.P. Ross, John Wiley & Sons

Semester- Three

ZOOL E 303

Bioinstrumentation and Biostatistics

Credits

Course Objectives: Objectives of the paper is to provide basic idea about working principles and application of different instruments and methods used in biological sciences. The course also designed to give statistical analysis of biological data.

Student Learning Outcomes: Students after completion of this course are expected to handle and operate basic instruments for their experimental purposes. The students also have clear understanding of data and its analysis that will help them in pursuing higher studies.

Unit I Microscopy, Centrifugation, Chromatography Lectures:16	<ol style="list-style-type: none">1. Light and Electron microscopy2. Centrifugation3. Affinity chromatography (Paper and TLC)4. Adsorption chromatography (Ion exchange and Gel)
Unit II Spectroscopy and Radioisotope techniques Lectures:16	<ol style="list-style-type: none">1. UV/Vis Spectrophotometry2. Autoradiography3. Immunodiffusion4. Application of Radioisotopes in Biology
Unit III Biostatistics-I Lectures:16	<ol style="list-style-type: none">1. Introduction and scope of Biostatistics, Levels of Measurements: Variables, Nominal scale, ordinal scale, interval and ratio scale of measurements.2. Tabular and graphical representation of data3. Descriptive statistics: Point estimates (Mean, Mode, Median, Percentile); Interval Estimates (Range, IQR, MAD, Variance, Standard Deviation, SEM, CV and CD); Error bars- various methods to calculate error bar: Standard Deviation (SD), Standard Error of the Mean (SEM), 95% Confidence Intervals (CI), Median, Range and Quartiles.4. Moments, Skewness and Kurtosis
Unit IV Biostatistics-II Lectures:16	<ol style="list-style-type: none">1. Confidence Intervals, Statistical Hypothesis Testing, significance level, p value, Relationship between Confidence Intervals and Statistical Significance, difference between parametric and non parametric test2. Student's t test, F test and ANOVA test (one way and two way), Chi-square test3. Probability distributions- Normal, Binomial and Poisson4. Simple correlation and Regression
	Recommended Textbooks and References: <ol style="list-style-type: none">1. Modern Spectroscopy, JM Hollas, Willey Publication2. Molecular Structure and Spectroscopy, G. Aruldash3. Experimental Biochemistry, Wilson and Walker4. Fundamental of light microscopy and electronic Imaging, Douglas Murphy5. Introductory biostatistics, C.T. Le, L.E. Eberly, John Wiley & Sons6. Biostatistics: A methodology for the health sciences, G. van Belle, L.D. Fisher, P.J. Heagerty, T. Lumley, Vol. 519, John Wiley & Sons7. Intuitive biostatistics: A nonmathematical guide to statistical thinking, H. Motulsky, Oxford University Press, USA

Semester-Three

ZOOL P 304

Laboratory course work-III

Credits

Course Objectives: Objectives of the paper is to provide a hand on exposure of different instruments used in biological sciences, basic practical on methods in biology, application of statistics in presentation of biological data and solving biological problems, basic embryological and immunological experiments.

Student Learning Outcomes: Students are expected to learn instrumentation and their operation, stastical analysis of data, identification of various stages of chick embryo and blood grouping

Instrumentation, Biostatistics, Immunology, Histochemistry and Entomology	<ol style="list-style-type: none">1. Permanent histochemical preparation for the localization of –<ol style="list-style-type: none">a. Protein by mercuric bromophenol blue methodb. Carbohydrate by PAS & toluidine blue methodc. Lipid by Sudan Black B method2. Identification with comments on histochemical slides3. Demonstrations of Electrophoresis4. Demonstrations of PCR5. Demonstration of Chromatography6. Demonstration of Centrifugation7. Demonstration of Spectrophotometer and Quantification of protein using Biuret method, lowry method8. Quantitive measurement of Biomolecules using Spectroscopy9. Estimation of casein content in milk10. Identification with comments upon animals with ecological adaptation and of evolutionary importance11. Tabular and Graphical presentation of Data using Excel and minitab12. Hypothesis testing-student t-test, F-test, NOVA test, Chi-Sqaure test,13. Practical related to simple correlation and regression analysis14. Demonstration of Blood group and Rh Antigen15. Permanent Slide of thymus and spleen16. External features of available field collected insects17. Methods of collection and preservation of insects18. Wing venation, types of wings and winf coupling apparatus19. Types of insect antenna, mouth parts and legs20. Insecticidal efficacy test
---	--

Semester-Three

ZOOL CT 300

Conservation Biology & Biodiversity

Credits

Course Objectives: Objectives of the paper is to provide basic idea on Biodiversity, measuring biodiversity, international and national efforts, molecular phylogeny and different conservation measures to conserve biodiversity.

Student Learning Outcomes: Students after completion of this course are expected to get a holistic understanding on biodiversity and its importance, phylogeny, inculcate the value of bio-resources and develop compassion toward bio-resources.

Unit I Conservation Biology and Biodiversity: a prologue Lectures:16	<ol style="list-style-type: none">1. Role of Science in conservation Biology2. Species and speciation3. Extinct Species4. Ethics and conservation
Unit II Threats to Biological Diversity Lectures:16	<ol style="list-style-type: none">1. Biodiversity Distribution2. Over exploitation3. Habitat destruction4. Alien species
Unit III Protected areas. Lectures:16	<ol style="list-style-type: none">1. Wild life sanctuaries2. National parks3. Biosphere reserves4. Wildlife corridors
Unit IV Restoration Biology Lectures:16	<ol style="list-style-type: none">1. Ecological restoration2. Conservation strategies (in situ and ex situ)3. Single species conservation4. Conservation Laws
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none">1. Fundamental of Ecology : O.P Odum2. Campbell Biology: Reece, Urry, Cain et al.3. Semester-Three

ZOOL VAC 305

Human Nutrition

Credits

Course Objectives: Objective of the paper is to provide brief idea about the human nutrition and nutrients.

Student Learning Outcomes: Students, after completion of this course, are expected to know about different essential nutrients, their role in human health and abnormalities associated with their deficiencies.

Unit I	Fundamentals of human nutrition and essential nutrients for human
Unit II	Basal metabolism and nutritional requirement variation with physiological changes and age, Supplementary and balanced diet
Unit III	Introduction to carbohydrate, protein, and fat. Different sources of these nutrients
Unit IV	Malnutrition and related disorders
An icon of an open book with two pages visible.	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none">1. SA Lanham-New, TR Hill, AM Gallagher, HH Vorster, Introduction to human nutrition, 3rd Ed, Willey Blackwell2. MJ Gibney, HH Vorster, FJ Kok, Introduction to human nutrition, Willey Blacwell Publishing3. SR Mudambi, MV Rajagopal, Fundamental Food Nutrition and Diet Therapy, New Age International Publishers4. SEMESTER-IV

Semester-Four

ZOOL C 401

Cytogenetics, Stress Physiology and Metabolic disorders

Credits

Course Objectives: The objective of course is to provide advanced knowledge on cytogenetics, stress physiology and metabolic disorders.

Student Learning Outcomes: Students are expected to learn differences aspects of genomic analysis, meiotic abnormalities, different sex linked diseases and in situ techniques. Also, the course will help students in understanding the physiology of stress and various metabolic disorders.

<p>Unit I Cytogenetics-I Lectures:16</p>	<ol style="list-style-type: none"> 1. C-value paradox 2. Human cytogenetics- Human karyotype, banding and nomenclature, Numerical and structural abnormalities of chromosomes 3. Meiotic abnormalities- Non-disjunction of chromosomes, mis-division of centromere 4. Repetitive and Non-repetitive DNA sequence
<p>Unit II Cytogenetics-II Lectures:16</p>	<ol style="list-style-type: none"> 1. Amniocentesis, Monogenic disorders: Autosomal dominant (Huntington's diseases), Autosomal recessive (Cystic fibrosis), 2. Sex linked (Color blindness and Hemophilia). 3. In situ- hybridization and its applications: FISH and GISH 4. Transposons and associated disorders
<p>Unit III Metabolic Disorders Lectures:16</p>	<ol style="list-style-type: none"> 1. Biochemistry of inherited and metabolic disorders: Phenylketoneuria, Alkaptonuria, Albinism 2. Neurochemical associated diseases: Alzheimer's disease, Parkinson's disease 3. Human nutrition and associated hazards 4. Molecular mechanism of senescence
<p>Unit IV Stress Physiology Lectures:16</p>	<ol style="list-style-type: none"> 1. Concept of Biological stress and strain 2. Stress adaptation- Resistance, stress tolerance, Acclimation and acclimatization 3. Thermoregulation in animals 4. Oxidative stress
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none"> 1. Molecular Cell Biology, Lodish, Berk, Kaiser, Krieger, Bretscher, Ploegh, Amon, Martin 2. Cell Biology, G. Karp 3. Cell and Molecular Biology, De Robertis 4. Lehinger Principles of Biochemistry, D.L. Nelson, M.M. Cox, 07th Edition 5. Biochemistry, J.M. Berg, L. Stryer, J.L. Tymoczko, G.J. Gatto, 08th Edition 6. Harper's Illustrated Biochemistry, V.L. Rodwell, D.A. Bender, K.M. Botham, P.J. Kennely, P.A. Weil, 31st Edition 7. Principles of Cancer Biology, L.J. Kleinsmith 8. Cancer Biology, R.J.B. King, M.W. Robins, 03rd Edition

Semester-Four

ZOOL E 402

Epigenetics, Molecular Techniques and Cancer Biology

Credits

Course Objectives: The objective of the course is to provide a comprehensive idea about epigenetic and its mechanism, and cancer cells biology

Student Learning Outcomes: The students are expected to learn epigenetic related disorders and their consequences, differences aspects of cell transformation from normal to cancer cells, different proteins and genes involved in different types of cancers, and treatment

<p>Unit I Epigenetics Lectures:16</p>	<ol style="list-style-type: none"> 1. Epigenetics: chromatin modifications and their mechanism of action, 2. Epigenetics and genome imprinting: DNA methylation in mammals, genomic imprinting in mammals, elementary idea on dosage compensation 3. Epigenetics in <i>Saccharomyces cerevisiae</i> 4. Gene silencing
<p>Unit II Mol. Techniques Lectures:16</p>	<ol style="list-style-type: none"> 1. Isolation of genomic and plasmid DNA 2. PCR and its application 3. DNA and protein sequencing methods 4. Blotting techniques
<p>Unit III Cancer Biology-I Lectures:16</p>	<ol style="list-style-type: none"> 1. Difference between normal cells and cancerous cell, Proto-oncogene, tumor suppressor genes and caretaker genes 2. Loss of function and gain of function mutation, 3. Cancer stem cells and its possible origin. 4. Brief idea on different genes/proteins related to cancer: p53, APC, src, ras, Rb, BRCA1 and BRCA2, P²¹ and P16.
<p>Unit IV Cancer Biology-II Lectures:16</p>	<ol style="list-style-type: none"> 1. Limitless replicating potential: Metastasis, and Angiogenesis 2. Apoptosis and Evasion of Apoptosis 3. Self sufficiency in growth signal, and Insensitive to antigrowth signals 4. Possible treatment of cancer: Radiation and chemotherapy
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none"> 1. Lewin's Genes X, J.E. Krebs, E.S. Golstein, S.T. Kilpatrick, Volume 10, Jones and Bartlett Publishers 2. Lehinger Principles of Biochemistry, D.L. Nelson, M.M. Cox, 07th Edition 3. Biochemistry, J.M. Berg, L. Stryer, J.L. Tymoczko, G.J. Gatto, 08th Edition 4. Harper's Illustrated Biochemistry, V.L. Rodwell, D.A. Bender, K.M. Botham, P.J. Kennely, P.A. Weil, 31st Edition 5. Principles of Cancer Biology, L.J. Kleinsmith 6. Cancer Biology, R.J.B. King, M.W. Robins, 03rd Edition

Semester-Four

ZOOL E 403

Applied Biology

Credits

Course Objectives: This course deals with human gene mapping, cell culture, transgenic, nano-technology, nano-particles and their application in drug delivery. The course also covers ecotechnology and Molecular techniques.

Student Learning Outcomes: Students after reading this course are expected to have knowledge orient towards industrial microbiology for self entrepreneurship development and application of nano-science in biological research. Further, it will enhance the students ability in various ecotechnological enterprenuership skills and advance molecular tools techniques.

Unit I Applied Genetics-I Lectures:16	<ol style="list-style-type: none">1. Introduction to functional genomics2. Genome analysis3. Comparative genomics4. Ribozyme technology and its application
Unit II Applied Genetics-II Lectures:16	<ol style="list-style-type: none">1. Genome and genomics2. Gene markers and their applications3. Genetic engineering and gene therapy4. DNA sensors and molecular diagnostics
Unit III Nanotechnology Lectures:16	<ol style="list-style-type: none">1. Nanotechnology- Break through an introduction2. Application of Nanotechnology,3. Bucky balls, Bucky tubes and their applications4. Nanotechnology in drug delivery
Unit IV Ecotechnology Lectures:16	<ol style="list-style-type: none">1. Solid waste management2. Biofertilizers3. Vermicomposting4. Biopesticide
	<p>Recommended Textbooks and References:</p> <ol style="list-style-type: none">1. Lewin's Genes X, J.E. Krebs, E.S. Golstein, S.T. Kilpatrick, Volume 10, Jones and bartlet Publishers2. Lehinger Principles of Biochemistry, D.L. Nelson, M.M. Cox, 07th Edition3. Biochemistry, J.M. Berg, L. Stryer, J.L. Tymoczko, G.J. Gatto, 08th Edition4. Harper's Illustrated Biochemistry, V.L. Rodwell, D.A. Bender, K.M. Botham, P.J. Kennely, P.A. Weil, 31st Edition5. Microbiology Principles and Explorations, J.G. Black, L.J. Black, 9th Edition, Willey Publishers6. Prescott's Microbiology, J. Willey, K. Sandman, D. Wood, 11th Edition7. Basic Principles of Nanotechnology, W.C. Sanders, CRC Press8. Introduction to Nanotechnology, C.P. Pools, F.J. Owens, Willey Publishers9. A handbook of Nanotechnology, U. Kumar10. Nanophysics and Nanotechnology, E.L. Wolf, Willey Publications

Semester-Four

ZOOL E 404

Developmental Biology and Radiation Biology

Credits

Course Objectives: The main objective of Developmental Biology course is make student understand the patterns and process of embryonic development, body plan, fate map, induction, competence, regulative and mosaic development, molecular and genetic approach for the study of developing embryo which is not necessarily shared with any other disciplines in the biological sciences. This paper also deal with Radiation Biology with special emphasis on different radiation sources, its health impact, use of radiation in controlling pest and its role in inherited diseases.

Student Learning Outcomes: Students are expected to learn the basic principle and process of developmental biology and Radiation Biology and able to make themselves aware to deleterious effects radiation too

Unit I Developmental Biology-I Lectures:16	<ol style="list-style-type: none">1. Gonads structures (Testis and Ovary)2. Synthesis and action of male hormones3. Synthesis and action of female hormones4. Female reproductive/gonadial cycle
Unit II Developmental Biology-II Lectures:16	<ol style="list-style-type: none">1. Structure of gametes (Male and Female)2. Gametogenesis and it's regulation3. Molecular mechanism of fertilization4. Cleavage and its pattern
Unit III Developmental Biology-III Lectures:16	<ol style="list-style-type: none">1. Basic experiments of developmental biology2. Axes and pattern formation in <i>Drosophila</i>3. Vulva formation in <i>Caenorhabditis elegans</i>4. Limb development and regeneration in vertebrates
Unit IV Radiation Biology Lectures:16	<ol style="list-style-type: none">1. Definition, scope and significance of radiation biology, Ionizing radiation, types of electromagnetic radiation2. Electromagnetic radiation and its interaction with living matter with special reference to UV and Visible light3. Radiation in insect pest management: Types of radiation used, radiation induced dominant lethal mutation, sterile insect technique, F₁ sterility technique4. Radiation induced heritable diseases
	Recommended Textbooks and References: <ol style="list-style-type: none">1. Developmental Biology, S.F. Gilbert2. Introduction to Embryology, B.L. Balinsky3. The Logic of Scientific discovery, K. Popper4. Understanding Radiation Biology from DNA Damage to Cancer and Radiation Risk, K.H. Chadwick5. Essentials of Radiation Biology and Protection, S. Fosher

Semester-Four

ZOOL D 405

Project, Dissertation and Viava-Voce

Credits

Course Objectives: The objectives of this course are to develop research aptitude, scientific temper and critical analysis among students.

Student Learning Outcomes: Students are expected to gain the basic skill in project handling and writing of their project report.

Plan and Execution	Students will be grouped and assigned to Concern faculties to plan and carryout projects on a topic of interest in order address critical issue or persue new and novel inventions. The students will carry out projects with self-involvement through thorough understanding and learning of different research tools and techniques. During their research tenure the students will also be taught about skills of writing thesis, articles, and projects for their future benefit.
Dissertation Thesis	At the end of their project, thesis has to be written giving full details about their project. Students will be insisted to publish their research findings in Journals of National and Interantional repute or file patent.

Semester-Four

ZOOL AC 406

Cultural Heritage of South Odisha

Credits

Course Objectives: Kabi Samrat Upendra Bhanja is the master-spirit of Odia Language and Culture during Medieval period. The campus of Berhampur University has been rightly named after Kabi Samrat Upendra Bhanja as „BHANJA BIHAR“. South Odisha is the adorable storehouse of literary and cultural wealth of ancient and medieval Odisha which has elicited remarkable national acclaim. This course has been introduced with a view to familiarizing all the P.G. Students of Berhampur University with the excellent craftsmanship exemplified by the literary stalwarts including Kabi Samrat Upendra Bhanja along with the Arts, Culture and Folk Tradition of South Odisha.

Student Learning Outcomes: The teaching imparted to the P.G. students of Science College (Auto.) Hinjilicut, Ganjam. on the various dimensions of the literary and cultural heritage of South Odisha will help them to acquire a valuable understanding of the same. They will be inspired adequately to take the positives learnt from the course and use them in future in their personal literary and cultural pursuits and thereby promote the literature and culture of Odisha on a global scale.

Unit I	Literary works of Kabi Samrat Upendra Bhanja
Unit II	Other Litterateurs of South Odisha
Unit III	Cultural Heritage of South Odisha
Unit IV	Folk and Tribal Traditions of South Odisha
	Recommended Textbooks and References: 1.
