Satisfied

Listen to teacher

In my opinion a few teachers are doing work fantastic and I am unable to express my gratitude for them. There is no quality of education and general electives (GE) class are not held regularly. The students are going to exam with self preparation.

There is no complaints box in the college campus. You people are doing exam very strictly but not your quality of teaching methods. When a student enter to the exam hall with line on his/her hand one of the teacher of philosophy saying that erase the line with rude behaviour. Actually the philosophy teacher do not know how a science students brain is, the line is quick response code(QR) and student eye is a scanner, through it all the answers will display on answer papers. How substandard this philosophy teacher was I still remembering.

Observation:Teacher's friendly behaviour in students,use very good teaching skills to teach students, teacher use projector while teaching to students

1.All teacher should take time to teach thoroughly

2. Exam should holding in good interval of time

1. Feedback is a justification about their grade or marks they received.

The three suggestions I would like to give would be

1. Students are often discouraged with the size and complexity of the syllabus. Teaching using informative videos and models will make learning fun and might take off some burden.
2. Teaching practical life skills like martial arts and compulsory physical education will enable students to see the value in keeping the body healthy and in good shape.
3. Seeing the social trends these days, it might be very helpful if we are taught basic finance management and investing in crypto currency or stock market investing. It really helps to have multiple sources of income.

Another such skill is coding skills, basic coding skills like python and Java can boost the performance and the probability of finding good jobs.
