#### 2. Board of studies meeting:

On 04-10-2023, the controller of Examinations of Science College (Autonomous) Hinjilicut called a Board of Studies meeting to review and update the curriculum. Key topics included course modifications, new topics, assessment methods, and incorporating student feedback. The Board of studies of Department of Mathematics had a thread ware discussion about the following topics:

1. Suggested methodologies for innovative teaching and evaluation techniques.

2. Suggested panel of names to the Academic council for appointment of examiners, Question paper setter and moderator.
3. Prepared syllabi for various courses keeping in view the objectives of the college, interest of the stakeholders and national requirement for consideration and approval of the Academic council.
4. Coordinate research, teaching, extension and other academic activities in the Department/college.
5. The Board of studies prepare Question Bank in each paper and submit it to the controller of Examinations.

### 3. INDUCTION MEETING

At the start of each academic session, the Department of Mathematics of Science College (Autonomous) Hinjilicut holds an induction meeting to welcome newly admitted UG students. This seminar, inaugurated by the Principal, involves senior students and all faculty members from the Department of Mathematics. The meeting focuses on discussing the syllabus, discipline, use of the college and departmental libraries, examination patterns, and departmental seminar presentations. Additionally, it highlights student achievements and their post-graduation engagement at various institutions. The induction programme was organized on 30.12.2023.

**Induction Programme on 30.12.2023**

#### 4. Study tour:

On February 12, 2024, the Department of Mathematics organized a study tour to explore geometric concepts and symmetries in Hindu temple architecture. The tour included visits to Maa Sidhhabhairabi Temple, Jagannath Temple, Mantridi, and Panchama Ganesh Temple, Jhinkipadar. The primary objective was to observe and analyze the intricate geometrical patterns and symmetries in temple constructions, directly related to the core course on Abstract Algebra, focusing on group theory and dihedral groups. Students had the opportunity to connect theoretical concepts with real-world architectural examples, enhancing their understanding of group symmetries and geometric transformations. The tour was both educational and inspiring, providing valuable insights into the application of mathematical principles in traditional art and architecture.
